

Job Description:

Title: Assistant Lease Manager Technical
Location: Shannon, Ireland
Direct Report: Head of Servicing
Job Type: Full-Time

Company Overview:

Stratos is an independent aircraft lessor specialising in large commercial aircraft. Our core business is remarketing, servicing and financing aircraft with over 40 aircraft currently under management. In order to support our growing aircraft portfolio, Stratos is now looking to recruit a technical professional to join its servicing platform based in Shannon, Ireland.

Position Overview:

The role involves the monitoring, completion and reporting of technical coordination tasks and project management relating to parked as well as on-lease aircraft.

Key Responsibilities:

- Initial set-up and continuous monitoring of technical data and tasks on Stratos' Managed Aircraft
- Support the Lease Manager Technical in:
 - Deliver / Re-delivery oversight
 - Annual physical and record inspection management
 - Maintenance escalation and reserves claim management
 - Maintenance fly-forward projections modelling
 - Maintenance adjusted valuation and end-of-lease compensation modelling
 - Aircraft, equipment and utilization tracking
 - Lease transition project budgeting
 - Generating technical specifications etc.
- Support other internal departments including legal, marketing and finance by assisting on technical-specific requests

Ideal Candidate:

- Minimum level of professional experience, ideally some time spent working overseas
- Aviation experience is desirable but not a necessity
- Must have a relevant degree qualification, preferably in aeronautical engineering
- Team member able to work autonomously and keep to tight deadlines
- Excellent organisational and communication skills
- Highly computer literate, including a high proficiency with excel, and knowledge of MS Access would be a plus.
- Demonstrate a systematic approach to tasks with a high attention to detail

Applications to be sent to info@stratos.aero
